

Sittingbourne, UK – 24th September 2024

PRESS RELEASE

Rehabilitation Manufacturing Services Appointed International sales agents for Kaye Walker™

Rehabilitation Manufacturing Services (RMS), a leading provider of rehabilitation and mobility solutions in the UK, are excited to announce that they have secured global rights, excluding the USA, to supply the highly acclaimed Kaye Walker.

RMS was selected as the appointed sales agent due to its longstanding reputation for over 45 years in the UK, known for manufacturing and distributing high-quality mobility products, including the Kaye Walker.

The Kaye Walker has earned significant recognition for its exceptional design and effectiveness in supporting children and adults with complex mobility needs. This global expansion aligns with RMS's vision statement: Empowering Every Individual to Live with Confidence and Dignity.

In the UK, The Kaye Walker is available in a range of colours—white, apple mint, orange, dark teal, and taupe grey—each corresponding to different walker sizes. Additionally, our UK offerings are produced in durable aluminium, which is also the sole material available in some international markets. This diverse range of colours is planned to be available to our international markets; just one example of how service users around the world will benefit from the same high-quality options as UK customers.

In line with the commitment to delivering unparalleled value, RMS will also offer a range of exclusive accessories, developed and manufactured in-house in the UK, to complement The Kaye Walker. These accessories are designed to meet the diverse needs of users and integrate seamlessly with the walker, ensuring optimal performance and user satisfaction.

Andrew Rainsbury, Global Sales Director for Export at RMS commented, "We are thrilled to extend the reach of the Kaye Walker beyond the UK. This milestone is a significant step in our global growth strategy, and we are confident that the Kaye Walker will make a positive impact in new markets worldwide. Our team is dedicated to providing top-quality products and support, and we look forward to introducing our successful supply model to both new and existing international customers."

Alan Wombell, RMS Director, added, "Securing the worldwide rights to the Kaye Walker is a landmark achievement for our company. This accomplishment not only reflects our commitment to expanding our global footprint but also highlights our dedication to enhancing mobility solutions for children and adults with complex needs. We are eager to leverage our expertise and proven supply model to make a meaningful difference in the lives of those who need it most."

The Kaye Walker is renowned for its exceptional design that promotes proper posture and enhances mobility for its users. With a focus on comfort and functionality, it has become a trusted choice for individuals requiring advanced mobility support.

About Rehabilitation Manufacturing Services (RMS) Limited
